

CH 139 SUNSEEKER PREDATOR 84

Following on from the bigger sibling with this time an optional flybridge and dual helm position, the Predator 84, brings additional new technologies and detailing into the line, drawing on the experience gained from the new and extending Sunseeker Yacht fleet. Considerably larger by waterline length and volume than its looks might suggest, this newcomer is set to turn heads with an impressive design-speed of 44knots when fitted with top engine and twin Arneson drive options.
